# HANNA-HI2020-02

edge® Multiparameter pH Meter

# HANNA Edge MULTIPARAMETER PH METER

Warranty & local technical support

Hanna Instruments is proud to introduce the world's most innovative pH meter: edge®. edge's groundbreaking design is the culmination of Hanna's vision, design capabilities, integrated production and world class R&D. The edge meter is only 0.5" thick yet rich in features to accommodate the needs of a vast amount of customers. For those that prefer very simplistic operation there is a basic mode operation with a simplified menu and options. For those who require advanced features there is the full featured standard operating mode. The edge HI2020 pH kit can be upgraded at any time with additional probes to measure Conductivity or Dissolved Oxygen.

edge® Dedicated Conductivity/TDS/Salinity  
Meter

Warranty & local technical support

# HANNA Edge DEDICATED CONDUCTIVITY/ TDS/SALINATY METER

Hanna Instruments is proud to introduce the world's most innovative Conductivity/TDS/Salinity meter: edge®.

edge®'s groundbreaking design is the culmination of Hanna's vision, design capabilities, integrated production and world-class R&D. edge® is a single meter that can measure **Conductivity, TDS and Salinity** and is incredibly easy to use.

## Capacitive Touch

edge® features a capacitive touch keypad that gives a distinctive, modern look. The keypad is sensitive enough to be used with laboratory gloves and has a fast response. Since the keypad is part of the screen, there are no buttons to get clogged with sample residue.

Global Warranty & local technical support

**Specifications :** This is a continuous type machine therefore production is greatly increased. The automatic Belt Warping Prevention Device keeps both the upper and lower belts in the same position. Using the feed back system, damage is prevented. (Patent Pending) Using the electronic thermostat and the SSR, the temperature difference's range is kept at  $\pm 3^{\circ}\text{C}$ . The SSR's electronic parts have no contact points making for durability. Various stackers can be used with this machine. This machine has a front conveyor belt which greatly increases production levels.

The Rotary Strip Off Device can be attached as optional equipment. By pushing the heater control switch the temperature of the upper and lower or front and rear heater can be easily controlled. This means various materials can be used safely. The pressure roller is covered with a layer of silicon rubber. The upper and lower pressure rollers are completely separated when the pressure is set at 0. The heating plate is covered with special hard alumite, making it durable. The exchange of belts is very easy. The Belt Stopping Device stops the belt automatically if the belt warps therefore protecting the belt. The entrance of the feed in point can be adjusted easily according to the thickness of the material and interlining being used. An anti puckering roller is installed in this machine. This roller's position can be adjusted. Wing tables can be attached to the work table. When these tables are not in use, they can be folded down. (Option) The pressure is easily adjusted. Depending on which of the optional tables is used, various shapes can be

# Safeguard

## Pull Test Apparatus

Rust proof

Universal Upper Grip (STA-0041) to minimize clamping failure & slippage

Upgraded lower Fabric Clamp (STA=0042) to provide Constant & Vertical Clamping

**Product Mechanical Safety Testers**

Cell: 01975804900~6 & 09678-848484

### Universal Mechanical Safety Tester

Attachment Strength Tests For All Accessories (e.g. Snaps & Buttons...)

This tester is the unique safety test instrument that provides a means to accurately measure how safe accessories are attached in a product. It is also used to compare a variety of accessories from different vendors in the process from product design to production so that we can safeguard our consumers.

It is a simple but effective design mainly consisting of a high precision gauge, a sturdy stand and special grips/clamps. It requires very little training. A sample required by standards & regulations is to fix horizontally (constant force is applied to secure the sample) so that snap or other accessories attached in fabric can be clamped into.

Moreover, a standard weight is also offered so that it can be regularly checked if it meets the safety requirements.

#### Standards Reference

JAPAN Product Liability Law, ASTM F963, EN 71, M&S P115A (for snap), P115 (for button), ASTM D4846-96 and many others.

#### Test Interpretation

There are lots of different test interpretations. Take snaps as an example. All snaps are usually tested to withstand attachment strength of 17 pounds (or 7.73 kg) for 10 seconds. If not, it is deemed to be mechanically unsafe unless it is not a small part & there is no sharp edge/point...

#### SafGuard's Main Outstanding Features & Benefits:

##### Better Cost-Effective And Quality Design:

- A Ergonomically Constructed**  
force meter holder can be retained upwards during sampling
- B User-friendly**  
side-wheel operation
- C Economically exchangeable** with a plenty of different of grips/clamps.
- D Longer Stand Spacious** for more applications.

##### Better Test Reproducibility And Repeatability:

- E Lower Fabric Clamp (STA-0042)**  
- Constant Clamping Force to minimize operation error.  
- Vertical Clamping to minimize unnecessary test failure.
- F Minimum Clamping Failure & Slippage** chiefly because our Universal Grip (STA-0041) can accurately secure snap and does not damage the fabric.

##### Better Recognition:

- G** Unlike others, SafGuard has been adopted by all world's leading textile testing labs (e.g. BV, CTL, Intertek, SGS & STR, TUV...) & the most influential retailers / renowned brands (e.g. GAP, H&M, LEVI'S, M&S, VF, Ralph Lauren childrenswear...).
- H** SafGuard is Patented (No. 2005200005331.0)

WARRANTY

### Standard Package:

**STA-0020**  
**Imada Force Gauge FB-30K**

Display the reading of pulling force with capacity up to 30 kg.

**STA-0041**  
**Upper Universal Grip**

Test for female part of snap & male part of stud.

**STA-0042**  
**Lower Fabric Clamp, Level Arm Locking**

Fix the sample with buttons firmly, flatly & constantly so that fabric slippage can be minimized.

**STA-0004**  
**Calibration Weight 15LB**

Routine checking the accuracy of the Imada Force Gauge. (15LB = 6.82kg)

**STA-0007**  
**Upper Long Nose Vise Grip**

Mainly used for trouser hooks and other smaller accessories.

**STA-0002**  
**Upper Stud Grip**

Test for male part of baby snaps but generally Upper Universal Snap Grip can be also applied instead.

**STA-0006**  
**Lower Grasp Button Accessory Kit**

Convert the original lower fabric clamp for testing the grasp buttons or larger buttons to 30 ligne and it is mainly used together with STA-0005.

**STA-0005**  
**Upper Grasp Button Grip**

Designed to gripping the grasp buttons or larger buttons, e.g. Jeans or Plastic Buttons up to 30 ligne.

### Optional Accessories:

**STA-0084**  
**Multifunction Vise Clamp**

Fix the garment between the jaw faces and will use with other upper grip for testing other attachments such as Patch, Side Tab, Zipper Puller, etc.

**STA-0037**  
**Small Part Cylinder - Plastic**

To test whether the garment accessories are classified as "Small Part" or not in accordance with EN71 & ASTM F963

**STA-0008**  
**Three Pronged Grip**

Test for four-hole buttons & Jeans buttons.

**STA-0035**  
**Goggles**

To protect the eye of operator.

#### Notes:

- a. Snapping & unsnapping (ASTM D4846) can be done by SafGuard by reverting Imada force gauge for compression.
- b. For changing market needs, we have other special grips/clamps, e.g. eyelets.
- c. Software driven SafGuard for constant force & speed programmable for more advanced tests can be available upon request
- d. Universal Grip (STA-0041) & Lower Fabric Clamp (STA-0042) can be used with other similar testers or even with UTM.
- e. Other than standard package, there are several models for different requirements of major retailers & different application.

### Professional Custom Engineering Services:

To keep up with changing market needs, professional custom designed clamps can be offered upon your request to use together with the apparatus. For quotation, please send us your end-product as samples, preliminary tests, and your specific requirements.
